

REMINDER - The State of Delaware list of covered medications (formulary) is changing effective July 1, 2014

Express Scripts reviews and updates the plan's list of covered medications each year to ensure that the plan is providing the most effective medication therapies for members at the most reasonable cost to the State of Delaware.

- Effective July 1, 2014, a total of 48 brand medications will be excluded from the State of Delaware's formulary. This means these drugs will no longer be covered under the State plan, and members would pay the total retail cost of the medication.
- Members who are currently taking medications that will be excluded should already have received a letter from Express Scripts listing alternatives. If an excluded medication is medically necessary, your doctor can file an appeal for an authorization to allow you to continue on this medication. If approved, the medication would be covered at the non-preferred level.
- If you have a question about a specific medication, please contact Express Scripts directly at 1-800-939-2142. For a list of affected medications, go to <http://ben.omb.delaware.gov/script/documents/formulary-exclusions.pdf>
